

Early Education Checkout Kits

Now available at Salmon Public Library for preschool, kindergarten and daycare providers!

Horseshoe Magnets Classroom Set

Explore the science of forces we cannot see with this colorful set of horseshoe magnets! Incorporate into your own lesson or try one of our suggested activities included with the kit.

Jumbo Eyedroppers Classroom Set

Build fine motor skills and manage mess with these jumbo-sized eyedroppers. Check out our included suggestions for using this tool to enhance experimental and sensory learning.

Magnifiers Classroom Set

Support early life science explorations with these extra-large magnifiers. Each glass even has its own stand for hands-free viewing. Incorporate into your own lesson or try one of our suggested activities included with the kit.

Tegu Blocks Classroom Set

A modern twist on a classic toy, these beautifully crafted wooden blocks have small magnets embedded inside. Challenge kids with building prompts or let their imaginations do the work!

"Think & Learn" Code-a-pillar

Program this caterpillar-bot to move forward, left or right using color-coded body segments. A great way to introduce early sequencing, problem solving and teamwork skills. See kit for activity ideas.

Botley, The Coding Robot

Botley uses a remote control for a 100% screen-free way to introduce kids to basic coding—as well as more advanced features like looping, line tracking and object detection. Not recommended for children under 4.
